1.0 BACKGROUND

The Federal Government of Nigeria (FGN) commissioned the United Nations Environmental Program (UNEP) to conduct an independent environmental assessment of Ogoniland in 2006. The UNEP report 'Environmental Assessment of Ogoniland', was submitted to the FGN in August 2011. The report had recommendations for the Nigerian Government, Oil companies (with operational interest in Ogoniland) and the Ogoni community. One of the key recommendations is for the Government to establish a body with the mandate to oversee the implementation of the UNEP report. The Hydrocarbon Pollution Remediation Project (HYPREP) was therefore established in July 2012 under the Ministry of Petroleum as the vehicle for implementing the UNEP report recommendations, but the initial efforts by HYPREP were less than successful thus the organization soon became moribund.

In June 2016, the FGN flagged off the Ogoniland Clean-up Campaign at Patrick Waterside, Bodo. A restructured HYPREP was established under the Federal Ministry of Environment (FMEnv) with a governance structure comprising of the Governing Council (GC), Board of Trustees (BOT), and Project Coordination Office (PCO) as stipulated in the Gazette.

As recommended in the UNEP report, the initial scope of projects and programs to be implemented by HYPREP are to cover the following key areas:

- **Environmental Remediation:** Clean-up of the hydrocarbon impacted sites, restoration of artisanal refining sites and any other identified polluted sites in the report including the clean-up of contaminated land, treatment of contaminated sediments, decontamination of groundwater, treatment of surface water, restoration of swamplands, mangrove restoration and rehabilitation, surveillance, and monitoring during and following clean-up operations in Ogoniland.
- **Potable Water Supply:** Provision of safe and alternative drinking water for communities whose water sources were contaminated by hydrocarbon pollution and the rehabilitation of selected existing water supply schemes amongst the eight (8) Emergency Measures that warranted immediate action.
- **Alternative Livelihoods:** Sustainable alternative livelihood programs for the Ogonis particularly those engaged in artisanal refining and oil bunkering, as well as other initiatives to address the socioeconomic impacts of oil pollution.
- **Public Health Assessments:** Investigations and evaluations of the nature, scope, and scale of impacts of hydrocarbon pollution on the health of the Ogoni people, and programs to monitor, mitigate and remedy the impact.

This report summarizes all the activities undertaken by the technical units of HYPREP in December 2022

2.0 ENVIRONMENTAL REMEDIATION UNIT

This report covers all activities carried out by the Environmental Remediation Unit in the month of November 2022. These activities includes:

- Monitoring and Supervision of Remediation Works
- NOSDRA Closeout/Certification Sampling and Resampling
- Shoreline Cleanup Assessment Technique (SCAT) Works

2.1 Monitoring and Supervision of Remediation Works

Monitoring and Supervision of remediation works/activities were carried out on the two (2) outstanding remediation lots/sites. They are:

1. Lot 032 at B. Dere / Gio in Gokana / Tai LGA (Contractor: Mosito Environmental Ltd).
2. Lot 052 at Okuluebu, Ogale in Eleme LGA (Contractor: Montego Upstream Services Ltd).

Below is the status of the remediation works carried out by these Contractors.

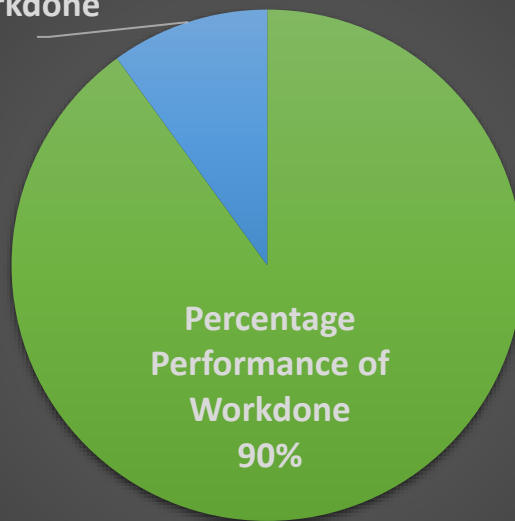

2.1.1 Status of Remediation Works at Lot 032 – B. Dere / Gio Gokana L.G.A (Mosito Environmental Ltd)

The remediation work is at 90% completion (Plate 2.2). Excavation and Treatment have been completed on all sections of the impacted area. The treated soils have been established to be below the Risk Based Corrective Action (RBCA) level of 1,000mg/kg following the analytical results of QA/QC samples taken. Currently, backfilling of all treated soils is ongoing (Plate 2.1 - 2.4). Once that is completed, External NOSDRA Closeout /Certification will be carried out.

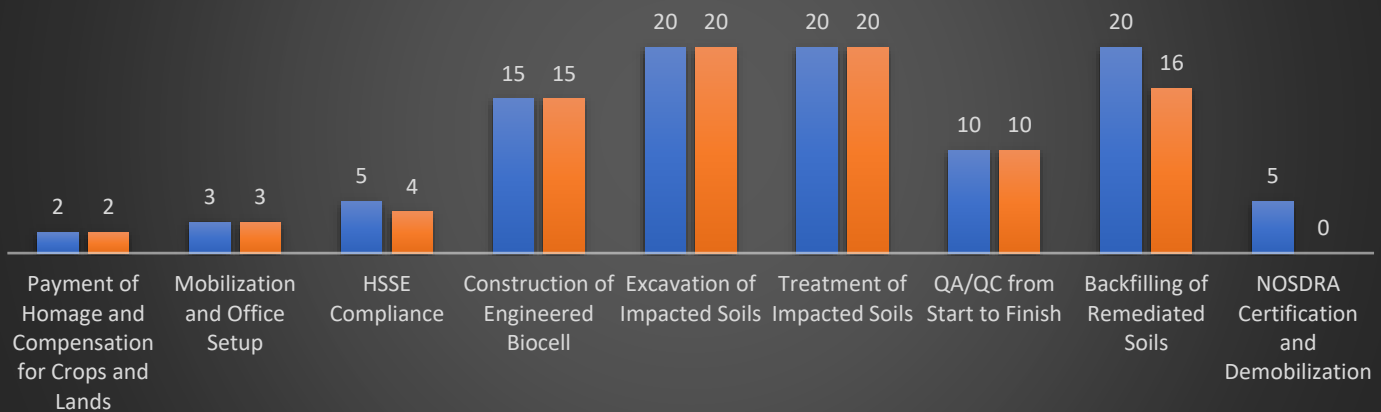

Plate 2.2: Graphical Representation of Lot 032 Remediation Activity Performance as at end of November 2022. (Total Score of Actual Work Done = 90 out of 100).

Plate 2.3: The Head Environmental Remediation Unit's (4th from right) Visit to Lot 032 site following their return to site to complete their backfilling and final site works (including demobilization and decommissioning).

Plate 2.4: Head Environmental Remediation Unit (gesturing) inspecting Remediation works being carried out by Mosito Environmental Resources Ltd at Lot 032 B-Dere/Gio, Gokana/Tai LGA during one of his routine leadership commitment supervisory sites visits.

2.2 Status of Remediation Works at Lot 052 – Okuluebu, Ogale Eleme LGA (Montego Upstream Services Ltd)

The remediation work at Lot 052 is still at 65% completion. No major activity was carried out by the contractor for this month. Excavation of the impacted area has been completed. Treatment of the impacted soils is still on-going. Quality Assurance / Quality Control (QA/QC) sampling has been undertaken on a section of the treated soils where treatment process has been completed. The analytical results of the samples taken have been established to be below the Risk Based Corrective Action (RBCA) level of 1,000mg/kg.

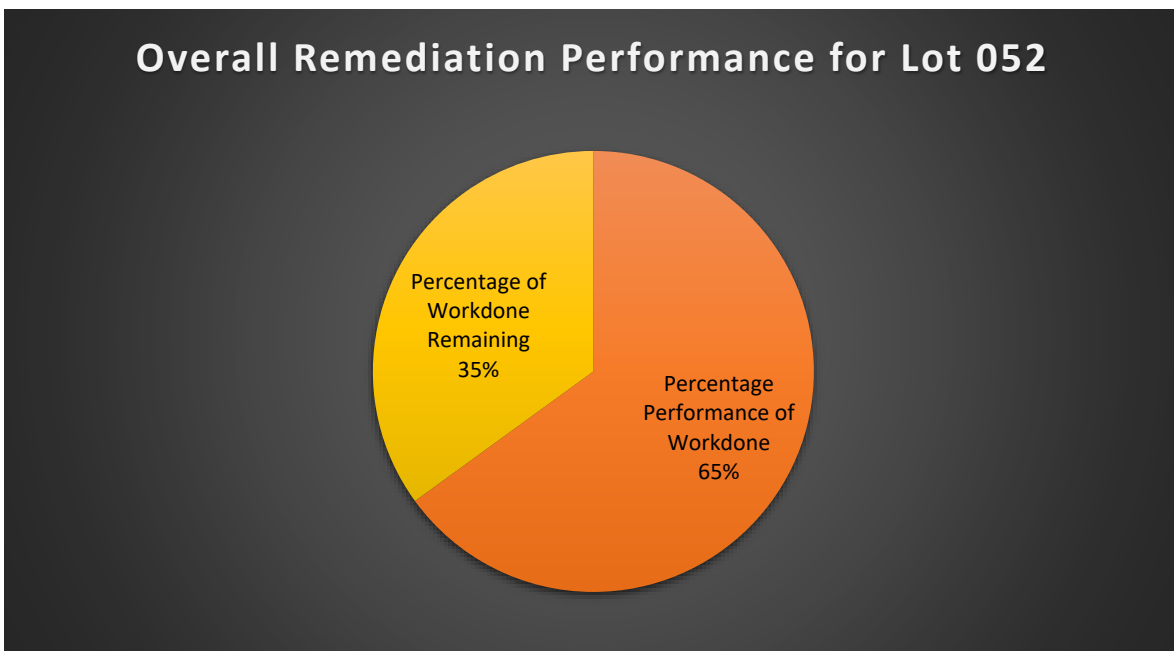

Plate 2.5: Graphical Representation of the Overall Remediation Performance for Lot 032 as at October 2022.

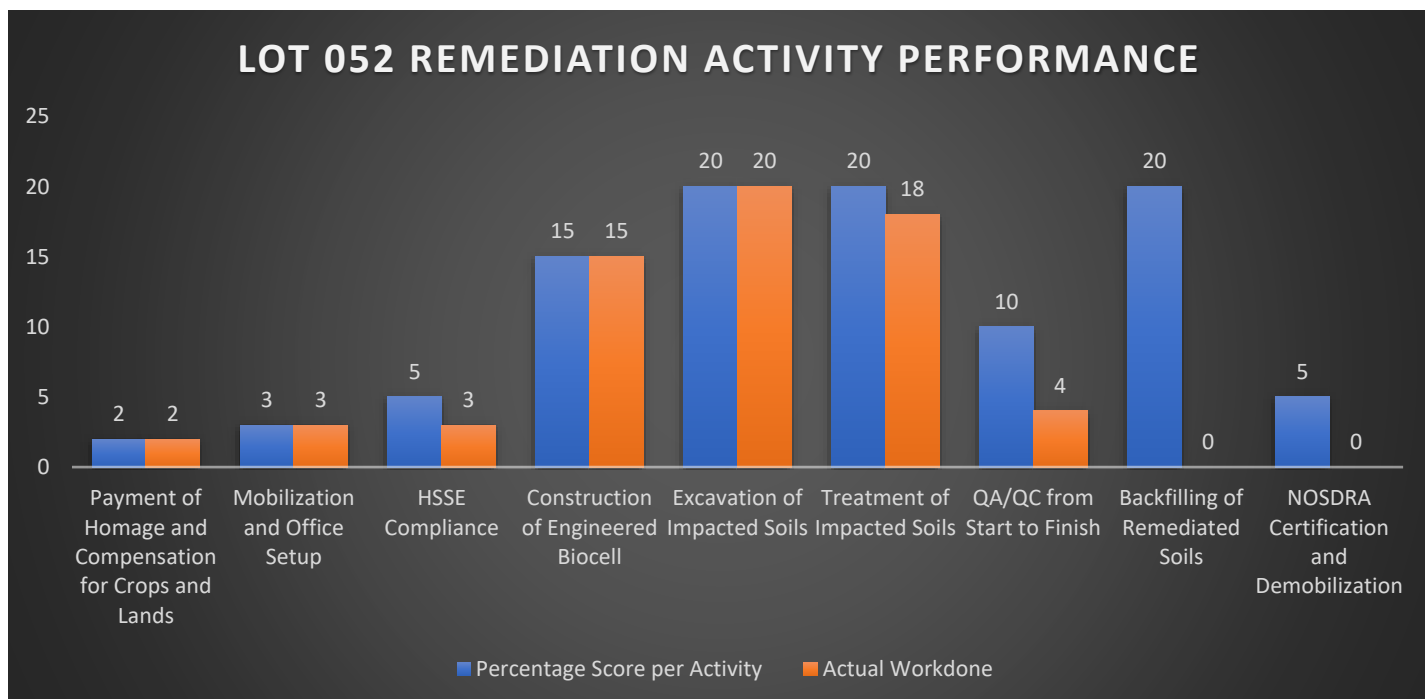

Plate 2.6: Graphical Representation of Lot 052 Remediation Activity Performance as at end of October 2022. (Total Score of Actual Work Done = 65 of 100).

2.2 NOSDRA Closeout/Certification Sampling and Remediation

The Batch 8 NOSDRA External Close-Out/Certification sampling and resampling was carried out for lots that had recently completed active remediation works and for those that have completed the provisional six (6) months post closeout/certification monitoring respectively.

The Close-Out Activity was carried out in the presence of regulatory agencies (NOSDRA, NUPRC, Rivers State Ministry of Environment), Civil Society (SDN), HYPREP, Contractor and Community Representatives.

Table 2.1: Below shows the Various Lots and Information of Close-Out Sampling.

S/N	LOT NO	SITE NAME/UNEP CODE	COMMUNITY/LGA	ACTIVITY	DATE OF SAMPLING
1	043	Aleto/Ngofa	Aleto/Elemo	Resampling	21/11/2022
2	045	(qc_002_003)			22/11/2022

2.3 Summary of Status of All Lots in Phase 1 Batch 1 & 2 Remediation Works

A total of 50 Lots from 21 Sites were contracted in the Phase 1, Batch 1 and 2 remediation works. Twenty-One (21) Lots from nine (9) sites in the Phase 1 Batch 1 and twenty-nine (29) Lots from twelve (12) sites in the Phase 1, Batch 2 remediation works.

Presently, active remediation works and NOSDRA closeout / certification processes have been completed successfully for twenty-seven (27) out of the fifty (50) Lots in Phase 1, Batch 1 and 2 remediation works. Twenty-two (21) other lots are at different stages of the NOSDRA closeout and Certification processes while two (2) Lots are still having outstanding remediation works.

A summary of the Status of Lots in Batch 1 and 2 of Phase 1 Remediation Works is provided in Table 2.2 below:

Table 2.2: Summary of Status of Lots in Phase 1 Batch 1 & 2 Remediation Works

SITE STATUS	REMEDIATION PHASE BATCH 1		REMEDIATION PHASE 1 BATCH 2		TOTAL (B1+B2)
	NO. OF LOTS	LOT NUMBERS	NO. OF LOTS	LOT NUMBERS*	
NOSDRA Close-out completed successfully	19	001 - 010, 012 - 015, 017 – 021	8	025, 026, 028, 042, 044, 046, 056, 057	26
Awaiting Regulatory Close-out Results	1	016	3	049, 051, 055	3

Total Monthly Performance Score (%)	2,096.00		2,817.00		4,913.00
Average Monthly Performance Score (%)	99.81		97.14		98.48

**Lot Numbers 035 – 041 were allocated to Tier 2 Detailed Quantitative Risk Assessment Works.*

2.4 Shoreline Cleanup Assessment Technique (SCAT) Works

As part of HYPREP's effort to commence the implementation of the UNEP recommendations with regards to shorelines clean-up and mangrove restoration, HYPREP in her 2021 work plan proposed to carry out Pre-SCAT assessment in the impacted Ogoni coastal communities in Gokana, Khana, Tai and Eleme Local Government Areas respectively.

Consequently, the HYPREP SCAT Team comprising of HYPREP Technical Staff and Stakeholders from NOSDRA, Rivers State Ministry of Environment (RSMENR), Stakeholders Democracy Network (SDN), KAGOTE, SWAYA and CEHRD have commenced the Pre-SCAT of coastal communities across the four (4) Local Government Areas in Ogoniland. The shoreline and coastal areas (shorelines, channels, mudflats and degraded mangrove platforms) of these communities are divided into grids of 200m X 200m.

The Pre-SCAT field activity for the month of November was carried out in Kpor and Bomu communities all in Gokana LGA. The team assessed a total of 86 grids (200m X 200m) covering an area of 344 hectares within these two communities. The assessed grids are along shorelines, channels, mud flats and degraded mangrove platforms.

Below are the breakdown of Coastal Communities and the number of assessed grids:

Table 2.3: Summary of the Number of Grids/Area Assessed for Each Coastal Community

S/N	Community	Grids	Area (sq m)	Area (ha)	Status
1	B-Dere	116	4,640,000	464	Completed
2	K-Dere	277	9,440,000	944	Completed

3	Goi	15	600,000	60	Suspended
4	Bodo	114	4,560,000	456	Suspended
5	Kpor	28	1,120,000	112	Completed (November)
6	Bomu	58	2,320,000	232	Still Ongoing (November)
Total		608	22,680,00	2,432	As at November, 2022.

3.0 HEALTH, SAFETY AND ENVIRONMENT (HSE) NOVEMBER MONTHLY REPORT

3.1 HEALTH AND SAFETY

The Project HSE team carried out site compliance monitoring, inspections, HSE induction and training in the month of November, 2022. Other activities carried out include

- Tool box meetings on sites.
- HSE compliance monitoring of SCAT activities
- HSE compliance monitoring of Close-out certification sampling exercises.
- Update of HSE documents (Ongoing)
- Awareness campaign on good HSE culture
- Sick bay functions.
- Issuance of permit to work to active remediation contractors.
- Issuance of PPEs to staff.

3.1.1 HSE STATISTICS

The health and safety statistics stated below are based on routine HSE site supervisions and inspections carried out on all active HYPREP sites (2 Remediation and 5 water sites) within the

four (4) local government areas in Ogoniland (Khana, Gokana, Tai & Eleme) in the month of November.

Table 3.1: Project HSE statistics

Description	Monthly	YTD (2022)
Actives sites (no)		7
Personnel on site (Avg.)	600	4,333
First Aid Case (FAC)	0	6
Medical Treatment Case (MTC)	0	6
Near miss (NM)	1	43
Lost Time Injury Free Days (Day)	0	172
Unsafe Acts/Unsafe Conditions (no)	43	1,835
Contractor Total Man-hour Exposure (Hr)	4,800	453,552

Fig 3.1: Summary of HSE statistics for the month.

3.1.1.1 HAZARD IDENTIFICATION AND REPORTING (HIR)

3.1.1.1.1 UA/UC CHART DISTRIBUTION CHART

The project unsafe act and unsafe conditions reported for the month of November 2022 is forty-three (43) and the distribution is represented below:

Table 3.2: UA/UC distribution.

S/N	Unsafe act / Unsafe condition	Remediation	Potable Water	Total
1	Poor House Keeping	18	13	31
2	Personal Protective Equipment (PPE) violation	3	5	8
3	Horseplay/Poor workers attitude	1	1	2
4	Defective tool	1	1	2

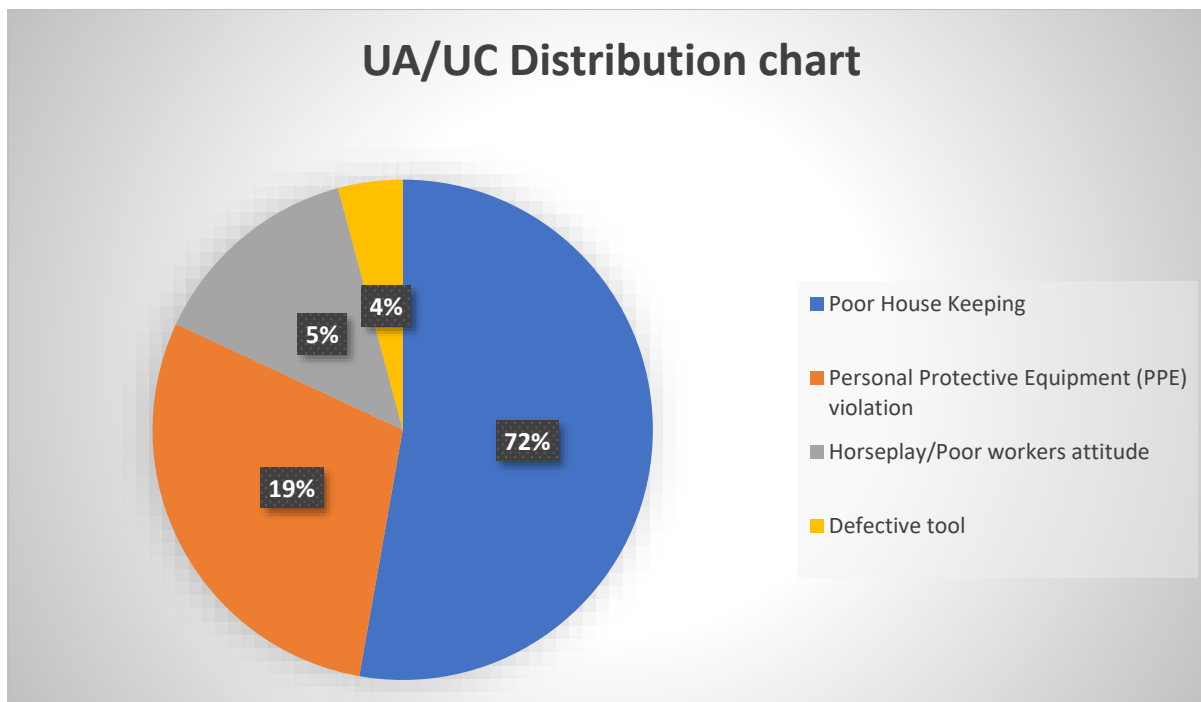

Fig. 3.2: Graphical representation of UA/UC distribution

3.3 LOOK-AHEAD

In December 2022, the HSE team will review, update the HSE plan, develop and cascade the Life Saving Rules(LSR) to HYPREP staff, create more HSE documents, issue PPEs to operational staff, conduct HSE induction trainings, conduct health surveillance/checks, undertake HSE inspections on all HYPREP active sites to monitor contractors HSE compliance, upgrading and installation of more fire alarm systems in the building, do regular testing of emergency response preparedness in-view of its effective operation, attend contractors monthly HSE meetings and HSE campaigns as maybe required.

4.0 PROVISION OF POTABLE WATER

The provision of potable water to the people of Ogoniland is advancing daily with the collective efforts of HYPREP's Potable Water Supervision Unit, the contractors, the communities hosting these projects and other relevant stakeholders, to ensure timely delivery to the people.

In further pursuant of this HYPREP mandate, rehabilitated water facilities and the freshly constructed ones are gradually approaching completion across various communities of the four (4) Local Government Areas (LGAs) in Ogoniland.

The status of work done on sites covering Bori/kpean; Barako/B-Dere; Terabor/Biara; Korokoro/Nonwa; Alesa/Agbonchia, and Ebubu/Nsisioken/Ogale communities are highlighted in the report below.

Plate 4.1: A fetch point at Alesa station

4.1 LOT 1: ALESA, ELEME LGA

Operations and maintenance activities are currently ongoing daily at the newly rehabilitated Alesa Headworks and booster stations. These stations currently supply drinking water to Alesa, Alode, Agbonchia, Aleto and part of Ogale communities.

Table 4.1: Activity Report for Lot 1

S/N	Activity	Status	Remark
	Operation and maintenance		
1.	Daily supply of potable water to Alesa, Alode, Agbonchia, Aleto and part of Ogale communities.	Ongoing	Routine check.
2.	Maintenance of pipes and fetching points.	Ongoing	Routine check.

Plate 4.2a: Fetching point at Alesa Headworks

Plate 4.2b: Filtration system at Alesa Headworks

4.2 LOT 2 EBUBU/NSISSIOKEN-OGALE, ELEME LGA

The construction of Ebubu and Ogale headworks, Eleme Local Government Area is at a general completion rate of over 86%.

Table 4.2: Activity Report for Lot 2

S/N	Activities	Status	Remarks
1	Installation of borehole well heads at Ogale.	Completed	
2	Installation of pressure valves and flow meters.	Completed	
3	Electrical wiring and installation of electrical devices in the buildings on-going at Ogale.	On-going	
4	Internal piping works ongoing at Ogale	O-going	

Plate 4.3a: Well head installation at Ogale, Eleme

Plate 4.3b: Internal connection ongoing at Ogale, Eleme LGA.

4.3 LOT 3: TERABOR/BIARA, GOKANA LGA

Rehabilitation of the Terabor Station and new booster station at Biara is above 82.5% general completion rate, with the service quarters and treatment house fully renovated. The major activity is the reticulation network which has covered 6 communities, out of the total 8.

Table 4.3: Activity Report for Lot 3

S/N	Activities	Status
1	Rehabilitation of Terabor headwork	Ongoing
2	Construction of Biara Booster Station	Ongoing
3	Pipe laying /distribution network-Pipe laying /distribution network at Mogho, Gbe, Lewe, Kpor, Nweol, Gioko, communities.	Ongoing
4	Construction of fetch points across Kpor, Lewe, Gbe, Mogho, Gioko, Nweol, communities.	Ongoing
5	Connection of filters and tanks	Ongoing

Plate 4.4a: Internal pipe connections ongoing at Terabor Station

Plate 4.4b: Internal connection of pressure filters at Terabor station.

4.4 LOT 4: BARAKO/B-DERE GOKANA

The newly constructed stations, at Barako and B-Dere communities, Gokana are at a general completion of 93%. The completed works include installation of overhead and ground tanks, construction of Staff quarters, treatment houses, etc.

Table 4.4: Activity Report for Lot 4

S/N	Activities	Status
1	Reticulation and distribution at Barako	Completed
2	Landscaping at Barako	Completed
3	Planting of green areas	Completed
4	Installation of solar light for security	Completed
5	Tank leakage tests and tightening/filling of leakage points.	Completed
6	Construction of fetching points at Barako.	Completed

Plate 4.5a: Landscaping completed at Lot 4, Barako Station.

Plate 4.5b: Mini-Laboratory set up at Barako Station.

4.5 LOT 5: KOROKORO/NONWA TAI

The Korokoro and Nonwa stations are at a general completion rate of over 83%. The installation of elevated and ground tanks has been completed while construction of filter systems, setting up of treatment house are currently ongoing.

Table 4.5: Activity Report for Lot 5

S/N	Activities	Status
1	Construction of fetching point at Korokoro.	Completed
2	Landscaping at Korokoro	Ongoing
3	Tiling of staff quarters at Korokoro	Completed
4	Installation of control panel at Korokoro	Completed

Plate 4.6a: Landscaping at Korokoro station, Tai LGA.

Plate 4.6b: Tiling at Korokoro, Tai LGA

4.6 LOT 6: BORI/KPEAN/ZAAKPON, KHANA LGA.

Activities at Lot 6 are at a general completion rate of 84.3% covering the rehabilitation of the Bori Water Station, fresh construction of Headworks at Kpean, and the construction of a new booster station at Zaaupon.

Table 4.6: Activity Report for Lot 6

S/N	Activities	Status
1	Reticulation network connections (pipe laying) at Kpean community in Khana LGA.	Ongoing

5.0 LIVELIHOOD PROGRAM

5.1 INTRODUCTION

The Livelihood Unit Report for November 2022 covers the activities of the Livelihood unit within the reporting period. This includes but is not limited to the successful screening of aviation applicants, follow up visits to environmental clubs, and assessment of verified businesses identified on the Needs Assessment form across the Four (4) LGAs etc.

5.2 SUCCESSFUL SCREENING OF AVIATION APPLICANTS

Following the application and shortlisting of qualified applicants for training in the aviation industry; the Project Coordination Office engaged Cabin Training Institute (CTI) to carry out the selection of One Hundred (100) trainees, twenty-five (25) persons per LGA. The screening was a three-day event and covered the following:

- Written test on Nov 8th at Suanu Finimale Hall Bori
- Oral Interview on Nov 9th at Suanu Finimale Hall Bori and
- Swimming test at Sports complex swimming pool, University of Port Harcourt.

A total of Three hundred and thirty-six (336) candidates were shortlisted and Sixty-One (68) candidates came out successful. They will be trained on

- Cabin Crew
- Flight Dispatch
- Customer Service and
- Ticketing

The selection process will be continued to achieve the set target of Twenty- Five (25) trainees per LGA. Below is a graphical representation of the successful candidates.

Table 5.1: graphical representation of the successful candidates.

LGA	Number Successful	Percent
Gokana	19	28
Khana	32	46
Tai	6	9
Eleme	12	17
Total	68	100

Fig 5.1 Pictures from the activity are arranged at the end of the report.

5.3 FOLLOW UP VISITS TO ENVIRONMENTAL CLUBS IN EBUBU, OGALE, KIRA AND BORI

In commemoration of the World Environment Day 2022, the Project Coordination Office established Twelve (12) Environmental Clubs Three (3) per LGA. The club provides students with the opportunity to learn more about HYPREP activities and their environment at large. The club also helps the students develop social life skills hence developing their minds to make informed decisions concerning their environment. The club activities are enriched by inviting experts from the Four (4) thematic areas of HYPREP (Water, Remediation, Public Health, and Livelihood) to enlighten and have interactive sessions with students on their activities.

NB: Pictures from the activity are arranged at the end of the report.

5.4 FOLLOW-UP ON VERIFIED BUSINESSES ACROSS THE FOUR (4) LGAs

The Livelihood Unit is currently following up with verified businesses to assess their businesses and identify areas in which support could be rendered. At the end of the exercise, selected businesses will be trained and strengthened to better run and sustain their businesses.

The table and graph below show the number of businesses identified on the Needs Assessment form and the number verified by Livelihood, Geographical Information System (GIS) and Stakeholders Engagement Teams.

Table 5.2: Number of businesses identified on the Needs Assessment form and the number verified by Livelihood, Geographical Information System (GIS) and Stakeholders Engagement Teams

S/No.	LOCAL GOVERNMENT AREA	BUSINESSES IDENTIFIED ON THE NEEDS ASSESSMENT FORMS	BUSINESSES VERIFIED	BUSINESSES ASSESSED
1	KHANA	61	24	17
2	TAI	26	9	6
3	GOKANA	11	5	4
4	ELEME	76	26	12
	TOTAL	174	64	39

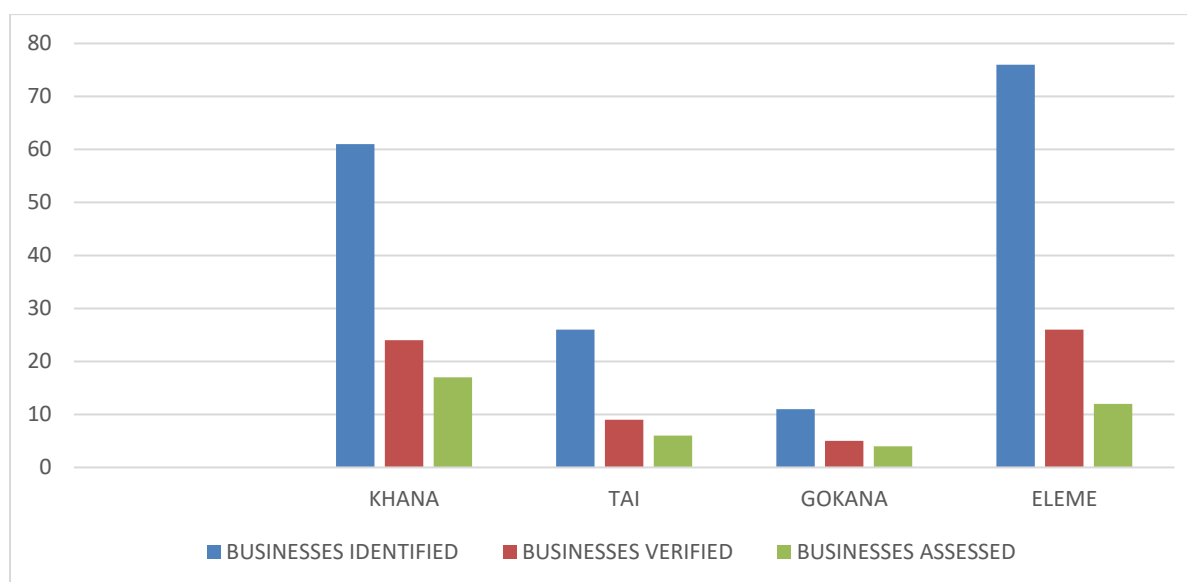

Fig 5.2: Showing the number of businesses identified on the Needs Assessment form and the number verified by Livelihood, Geographical Information System (GIS) and Stakeholders Engagement Teams

5.5 SUMMARY OF LIVELIHOOD ACTIVITIES FOR NOVEMBER 2022

1. Successful screening of aviation applicants from 8th to 10th November 2022.
2. Notification of successful applicants.
3. Follow up visits to environmental clubs in Ebubu, Ogale, Kira and Bori.
4. Follow up on verified businesses across the Four (4) LGAs.
